

Non-Pleated Wall Curtains or Window Curtains are used to create privacy and block outside light. They are made as a pair that meet in the middle with Velcro, unless otherwise specified. They are made with #9 Glide Tape sewn into the top. Bottom Glide Tape and track can be ordered for windows on an angle. They are made ready to hang and are finished with your choice of liner.

With a measuring tape, measure the width of the opening, horizontally, from the left, to the right, as best you can for **curtain width**. Do not measure the window. Tell us how many inches this panel will cover in the closed position. We will adjust and add the appropriate amount to ensure fullness when closed. Usually 6" to 8" per panel.

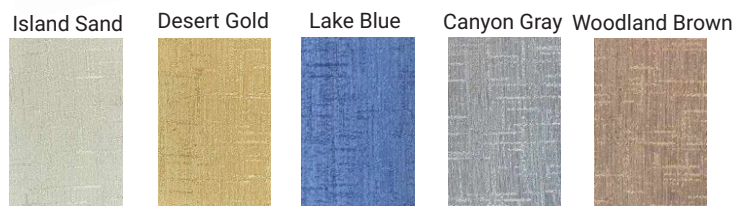

For **curtain height**, measure from the top of the track to the desired point where the curtain should finish. All curtain pairs connect with a Velcro strip at the top and middle of each panel.

Window curtains come with 3/8" wall mount top track, Glide Tape sewn in, and one 16" x 3" tie-back with Velcro closure with hardware per panel. Choose the same color as the curtain, or a contrasting color for a designer inspired look. Add Glide Tape and additional bottom track for curtains that hang on an angle.

### Dimensional Fabric Color Options

In line with the latest interior design trends, we are pleased to introduce our new collection, showcasing the innovative new material, Dimensional fabric. This premium material offers versatility and cost-effectiveness, while enhancing the aesthetics of your interior living space.

### Liner Material Options - by HANES

All materials are in compliance with motor vehicle, fire-safety regulations NFPA 701 and FMVSS 302.

All measurements should be in inches.  
Add all widths together for the total width.  
Pricing is calculated on total track width.
