

With a vinyl measuring tape, measure the width of the **driver side** track horizontally, from the left, to the right, following the curve as best you can. Tell us how many inches this panel will cover in the closed position. We will adjust and add the appropriate amount to ensure fullness when closed. Usually 6" to 8" per panel. Follow the same steps for the **passenger side**. Measure each side separately, they are not always the same.

2 panels are standard; 3 or 4 panel drapes are available for an additional charge.

If a 3rd panel is needed to cover the entry door, behind the passenger seat, measure the section of track from left to right and record it as the passenger, and record the passenger as the center measurement.

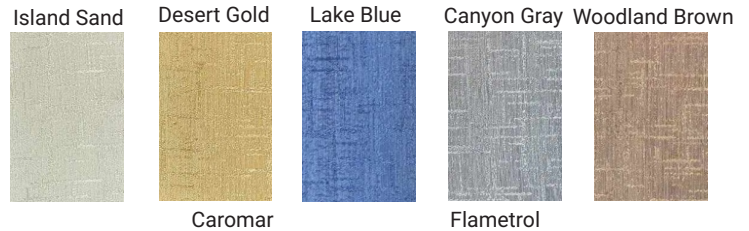

All panels will connect with a 3" Velcro strip at the top and middle of each panel. Center panels will get Velcro on both the left and right sides.

For **drape height**, measure from the top of the track to the desired point where the drape should finish. If you have existing RV drapes, measure the height from top to bottom.

One pair of 18" x 6" tie-backs with Velcro closure and hardware are included. Choose the same color as the drapes, or a contrasting color for a designer inspired look.

Dimensional Fabric Color Options

In line with the latest interior design trends, we are pleased to introduce our updated collection, showcasing the innovative new material, Dimensional fabric. This premium material offers versatility and cost-effectiveness, while enhancing the aesthetics of your interior living space.

Liner Material Options - by HANES

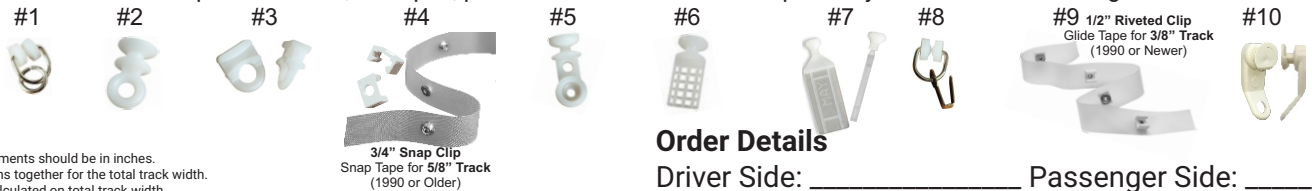

All materials are in compliance with motor vehicle, fire-safety regulations NFPA 701 and FMVSS 302.

Carrier Attachment (circle one)

The new drapes will hang on your existing track and we will provide new carriers.

The carrier is the hardware that suspends the drapery along the track. If #5 or #6 are selected, you will receive carrier #2. If #7 is selected, you will receive carrier #3, and if #8 is selected, you will receive carrier #1. The replacement carriers are compatible with your current track when used with the provided steel, z-shaped, pin-hooks. This makes the drapes easy to remove for cleaning and maintenance.

All measurements should be in inches. Add all widths together for the total track width. Pricing is calculated on total track width.
